

ANAS PIRZADA

FULL STACK SOFTWARE ENGINEER | NEXT.JS, REACT.JS | DJANGO, PYTHON

+966 59 518 4842  anaspirzadaiub@gmail.com  <https://anaspirzada.vercel.app>  [Anas Pirzada](#)

SUMMARY

Full Stack Software Engineer with 4+ years of experience designing and delivering scalable, high-performance web applications from architecture to production deployment. Strong expertise in building secure RESTful APIs using Django, FastAPI, and Node.js, alongside modern frontend frameworks including React.js and Next.js. Experienced in database modeling (MySQL, MongoDB), authentication strategies, caching mechanisms, and backend performance optimization. Proficient in system architecture (MVC/MVT), CI/CD pipelines, and cloud-based deployments. Adept at owning complete product lifecycles, ensuring reliability, scalability, and maintainability while delivering measurable business impact.

SKILLS

Frontend Technologies

- React.js (Hooks, Context API, Redux Toolkit), Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, Framer Motion, GSAP

Backend Technologies

- Django, FastAPI, Node.js, Serverless Functions, Cloud Functions

Databases

- MySQL, MongoDB, Firebase Realtime Database, Supabase

APIs & Integrations

- RESTful APIs, GraphQL, Firebase Auth, Stripe Payments, Google Maps API, EmailJS, AI Tool Integrations

Architecture & System Design

- MVC & MVT Architecture, Component-Based Architecture, Micro-Frontend Architecture, Monorepo & Modular Project Organization, Clean Code Principles

DevOps & Cloud Infrastructure

- AWS, DigitalOcean, Vercel, Render, Redis (Caching), CI/CD Pipelines, Git/GitHub Actions, Server Deployment & Environment Configuration, SSR & SSG (Next.js), Performance Optimization

PROFESSIONAL EXPERIENCE

NEXT JS DEVELOPER | Maham AI | Riyadh, Saudi Arabia

Aug 2025 - Dec 2025

- Delivered high-quality frontend interfaces with seamless UI integration, optimized performance, and scalable architecture using modern frameworks.
- Built and maintained API-driven features, ensuring smooth data flow, clean state management, and reliable user experiences across multiple apps.
- Leveraged AI-powered tools to speed up development, enhance code quality, automate workflows, and streamline the overall frontend building process.
- Developed responsive, high-performance frontend modules with clean UI workflows, modern APIs, and efficient developer tooling to accelerate product delivery.

Senior Full Stack Developer | Createex | Lahore, Pakistan

Jun 2023 - Feb 2025

- Designed and developed full-stack web applications using React.js, Next.js, Node.js, and Firebase, delivering scalable and high-performance systems that improved user engagement by 35%.
- Architected and integrated 300+ RESTful APIs and third-party services, ensuring secure data flow, optimized backend communication, and seamless frontend-backend interaction.
- Implemented authentication systems, real-time databases, and cloud storage solutions using Firebase, reducing server response time by 30% and improving system reliability.
- Structured modular application architecture, optimized database queries, and resolved production-level issues, enhancing overall performance and scalability by 40%.
- Managed end-to-end development lifecycle including system design, feature implementation, deployment, production monitoring, and post-release support.

- Integrated APIs using Postman, boosting the functionality and efficiency of software systems by 25%.
- Harnessed the power of Google Maps APIs to optimize real-time data handling, improving data accuracy and load time by 20%.
- Consistently delivered effective solutions by seamlessly blending front-end and back-end technologies while optimizing state management, resulting in smooth UX and 99% uptime.
- Developed RESTful web services using the Laravel framework, efficiently managing JSON data formats to ensure fast and reliable data communication across all endpoints.

PROJECT

Dolabb

Developed a full-stack fashion marketplace with product management, cart, and order workflows using API-driven architecture and relational database design. Integrated secure authentication, payment processing, and optimized backend performance for scalable transactions.

Akunuba

Built a full-stack AI-powered wealth dashboard using Next.js and Django, designing secure REST APIs, structured financial databases, and role-based authentication. Implemented real-time data processing, analytics integration, and deployed a scalable production-ready architecture.

Teklabspace

Engineered a full-stack bug-bounty platform with secure role-based dashboards, vulnerability submission APIs, and structured reward tracking database models. Built protected endpoints, real-time reporting workflows, and deployed a scalable cloud-based infrastructure.

Sleek Assured

Developed a full-stack booking platform with React.js frontend, backend APIs, and structured database for customer orders and scheduling. Integrated Stripe payments, secure transactions, dynamic pricing logic, and deployed a production-ready optimized system.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science

May 2019 - May 2023

The Islamia University of Bahawalpur

I graduated with a grade B ranking and gained a strong foundation in programming languages, database management, networking, and software engineering. Acquired in-depth knowledge of programming languages such as Java, C++, and Python, as well as database systems like MySQL and MongoDB and networking protocols, which enhanced theoretical and practical understanding. Actively participated in student societies, developing leadership, teamwork, and communication skills. Applied academic knowledge to real-world projects, strengthening problem-solving, critical thinking, and collaborative abilities.

Data Science with Python & Data Visualization

Aug 2022 - Feb 2023

Data Camp

- Hands-on experience with data analysis, Pandas, Matplotlib & Seaborn.

LinkedIn Learning

2024 - 2025

- Advanced React.js
- JavaScript: Async Programming & Promises
- Git Essential Training
- Learning REST APIs
- Advance Full Stack Development
